DETAILED ACTION

Allowable Subject Matter

1. Claims 4, 5, 7, 8, 9, 10, 13 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art made of record, in single or in combination, fails to disclose explicitly the limitations of:

“a broadband access server (BAS) connected to said OLT, said BAS having a function for authorizing users communicating with the Internet, via the ONUs and the OLT, wherein said BAS has a function for controlling said OLT through a first physical line connecting therefrom and directly to the OLT using information of the users obtained from only one Remote Authentication Dial In User Service (RADIUS) server which is connected only with the BAS and manages information of the users when authorizing the users to communicate with the Internet, and the BAS has a function for sending and receiving bandwidth control packets through said first physical line to the OLT for controlling user bandwidths at the OLT, and setting bandwidths per user for the users to send and receive user packets through a second physical line directly connecting between the BAS and the OLT” as disclosed in claim 4;

“a broadband access server (BAS) connected to said OLT, said BAS having a function for authorizing users communicating with the Internet via the ONUs and the OLT, wherein said BAS has a function for controlling said OLT system by sending and receiving bandwidth control packets between the BAS and the OLT through a first physical line directly connecting between the BAS and the OLT to transfer user

Art Unit: 2619

packets exchanged between the Internet and the users via a second physical line directly connecting between the BAS and the OLT, using information of the users obtained from only one Remote Authentication Dial In User Service (RADIUS) server which is connected only with the BAS and manages said information of the users when authorizing the users to communicate with the Internet, and said bandwidth control packets control user bandwidths at the OLT by setting bandwidths per user for the users to send and receive said user packets” as disclosed in claim 5;

“wherein the packet communicating apparatus multiplexes sending data to the plural optical network units and sends the multiplexed sending data to the star coupler, the star coupler broadcasts the multiplexed sending data to the optical network units, and each of the optical network units receives data directed thereto, wherein the packet communicating apparatus comprises: an optical line termination (OLT) for subsidiarily connecting optical network units (ONUs) by the Passive Optical Network system (PON), said OLT having a function for controlling bandwidths between the optical line termination and the optical network units; and a broadband access server (BAS) connected to the optical line termination, that has a function for authorizing users who communicate with a network via the optical network units and the optical line termination, wherein the BAS has a function for controlling said OLT by sending and receiving bandwidth control packets between the BAS and the OLT through a first physical line directly connecting between the BAS and the OLT to transfer user packets exchanged between the Internet and the users via a second physical line directly connecting between the BAS and the OLT, and using information of the users obtained

from only one Remote Authentication Dial In User Service (RADIUS) server which is connected only with the BAS and manages said information of the users when authorizing the users to communicate with the Internet, and said bandwidth control packets control user bandwidths at the optical line termination by setting bandwidths on a per-user basis for the users to send and receive said user packets” as disclosed in claim 13.

3. Additionally, all of further limitations in claims 7 - 10 are allowable since the claims are dependent upon independent claim.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
